

A short description of the Chess Application

Group 6

19-02-2018

1 What *is* "The Chess Application"?

"The Chess Application" is a chess game platform that focuses giving players of any age the chance to play classical checkers digitally. The application offers functionality and stability, with easy to use controls. "The Chess Application" comes with all functionality of a regular chessboard, with the choice of challenging a computer controlled opponent of variable skill.

2 How does it work?

"The Chess Application" comes with an easy to use GUI, where players select single- or multi-player, or choose to challenge an AI of variable skill. The player simply moves the pieces with their mouse and **can even take a tutorial to learn how to play!**
